

# LC/SC SERIES CONNECTORS

## Product Bulletin

Building on our very successful Fiber Optic adapters line, JAE now offers an LC to SC adapter to enable direct connection between the two styles, despite their different ferrule diameters (LC 1.25mm dia, SC 2.5mm dia)

### FEATURES

- Fiber Optic adapter
- LC shell to SC shell.
- Insertion loss: 0.5dB max
- 500 cycle durability
- Standard SC panel compatible
- **Lead-free/RoHS-compliant**

Low insertion loss and high durability are ensured by using a precise zirconia ceramic split sleeve insert. In addition, this adapter can be applied to the same panel pattern as a normal SC adapter without any modification.

Part numbers can easily be identified with the **FO-LC/SC** prefix.
