

NEW PRODUCT RELEASE

Richco Inc. has added the KKG-3.6A1-RT to our extensive line of extruded Kwik Klips. These clips are ideal for routing cables along corners. The unique design of the KKG-3.6A1-RT allows the user to easily snap in fiber, or cable and lock it in place. The clips are extruded from a durable PVC material and can be provided in any specified length. The KKG-3.6A1-RT comes with a rubber duple backed adhesive on the base that provides for easy installation. To view all Klip styles, refer to Richco's catalog or the Richco website at www.Richco-Inc.com.
