

Richco®

FIBER OPTIC ENGINEERING DESIGN KIT

FIBER OPTIC ENGINEERING DESIGN KIT

NEW PRODUCT RELEASE

Richco Inc. introduces the Fiber Optic Engineering Design Kit filled with all that Richco has to offer for the Fiber Optics industry. Starting with Richco's partnership with Miniflex Ltd. to offer the Optical Fiber Bend Limiting Tubing (OFBLT), which provides bend and crush protection for fragile fiber optic cable. Used with the OFBLT are a variety of breakout units and routing devices designed to provide bending, crush, and strain relief protection through critical breakout and points of cable vulnerability in a design. Also inside this useful kit are standard Richco wire routing devices and cable management that are exceptional in the Fiber Optics industry, just as they were in the copper cabling industry.

PART FEATURES

- Easy to handle carrying case
- All products related to fiber optic applications

BENEFITS

- All parts in one place
- Industry specific samples

TARGET MARKETS

- Electronics
- Datacom
- Telecom
