

SOLUTIONS FOR THE INTERNET OF THINGS

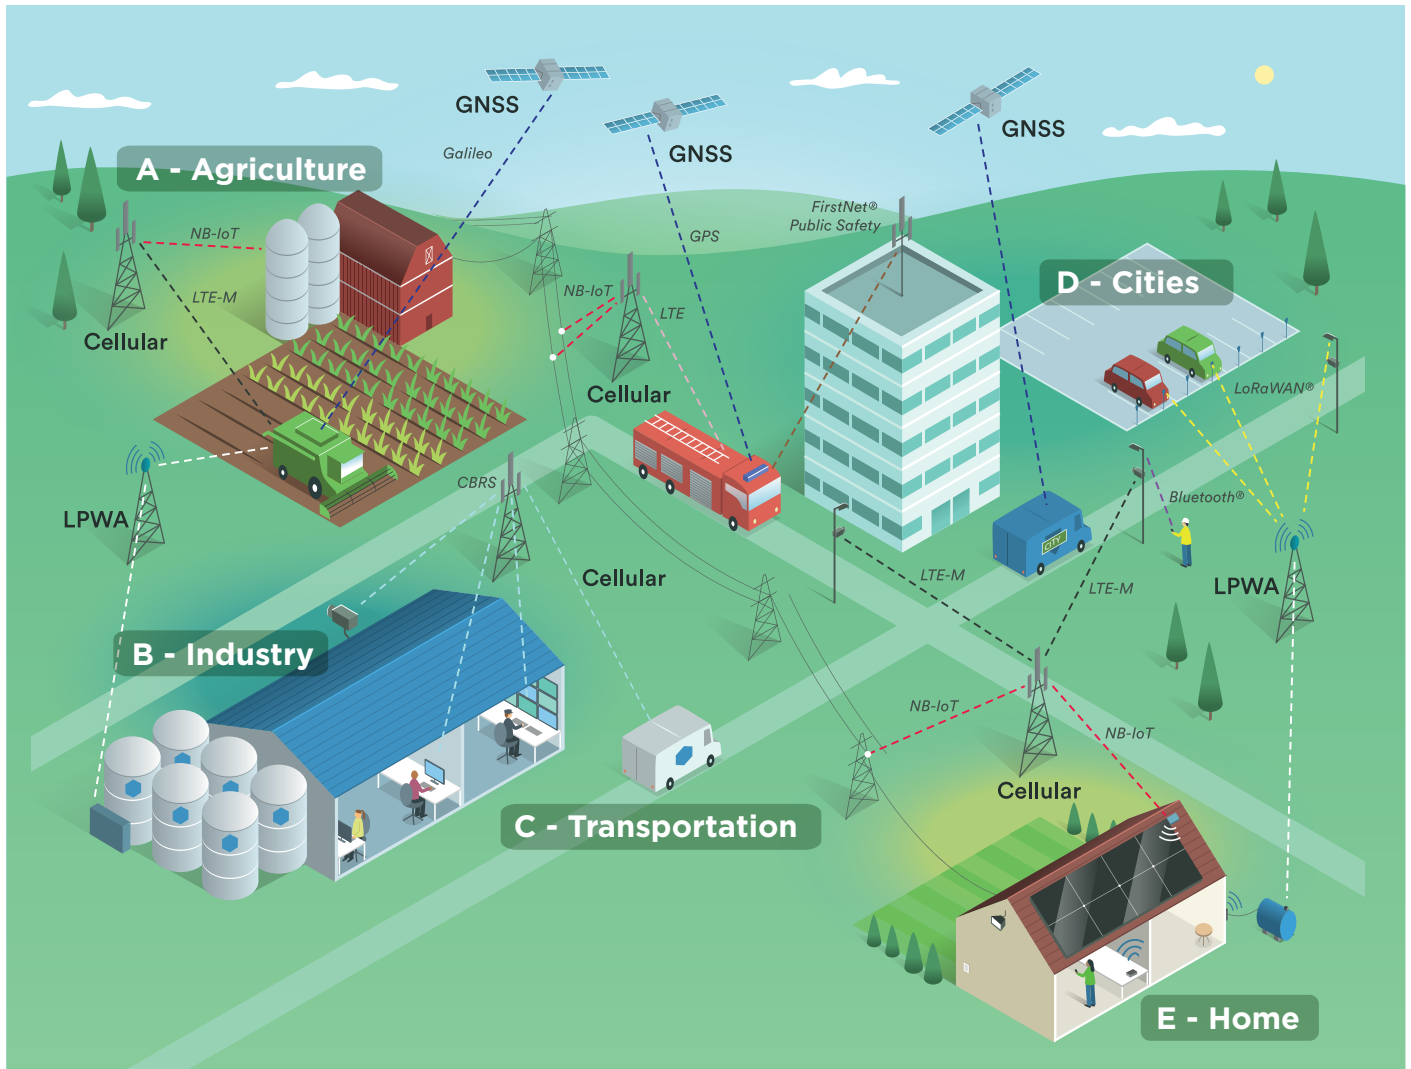

Quick Reference Guide

Engineering a more connected future of everything with a broad portfolio of industry-leading antennas and connectors, supporting multi-frequency applications for some of today's most ambitious IoT designs

THE INTERNET OF THINGS: CONNECTING THE FUTURE OF EVERYTHING

In every industry and in every application, wireless connectivity is the business-critical upgrade driving the world's cutting edge products and services. In retail, smart metering, remote monitoring, transportation, public safety, and everything in between, getting data to the cloud and enabling sense and control on the ground is critical to satisfying customer demand and enabling smarter products that produce previously-impossible results. The right IoT solutions are critical to robust, cutting-edge next generation products that perform reliably in the field, no matter what. TE Connectivity's (TE) expanded line of antennas and connectors are enabling new possibilities, driving us towards a more connected future of everything.

HOW TE SUPPORTS THE IoT ECOSYSTEM

A - AGRICULTURE

- Smart Farming
- [Smart Tracking](#)
- Environmental Monitoring

B - INDUSTRY

- Warehouse Automation
- Mobile Robotics
- Inventory Management

C - TRANSPORTATION

- [Fleet Telematics](#)
- [Public Safety](#)
- [Electric Vehicle Charging](#)

D - CITIES

- [Smart Buildings](#)
- [Smart Health](#)
- [Smart Surveillance](#)

E - HOME

- [Smart Meters](#)
- Home Security
- Connected Home

TE RF IMPLEMENTATION SUPPORT

TE has designed, produced, sold, and shipped over 1 billion antennas globally and is one of the largest suppliers of IoT antennas in the world. TE can provide advanced antenna solutions for most wireless devices, with many combinations to address customer required features. Our antenna designs can accommodate a broad range of frequency bands for operation on network in both regional and global markets.

- Customer project baseline evaluation
- Tuning of standard antenna solution
- Custom specific antenna solution
- Throughput, efficiency, and coexistence optimization
- Active and passive antenna performance
- Radiation pattern/SAR optimization
- Design for manufacturing
- World-class fully-integrated manufacturing capabilities

MEETING THE COMPONENT REQUIREMENTS OF IoT END DEVICES

TE Connectivity offers products and expertise to help meet challenging and varied requirements. As TE evolves existing products and develops new ones to support the Internet of Things, we consider:

Durability

- Mating Cycles
- Reliable/Tested
- High Efficiency

Miniaturization

- Fine Pitch & Low-Profile Connectors
- Scalable & Light-Weight
- Custom Designed or Off the Shelf Antennas

Modular Designs

- Footprint/Position Range
- Density Options
- Mounting/Mating Options
- Connector and Cable Options
- Widest Single Range Connectors
- Efficient and Reliable Antennas in Multiple Frequencies

EMI/Grounding

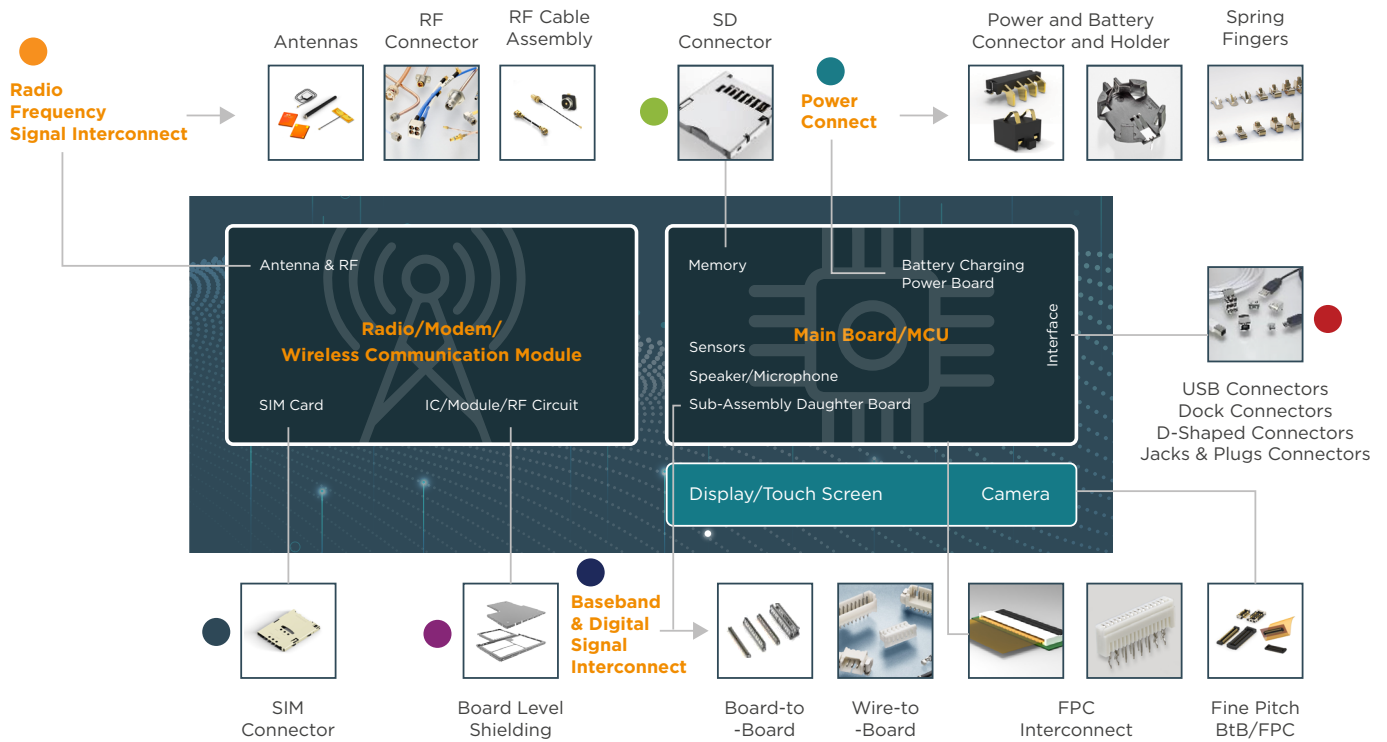

- Customizable & Scalable
- Your Operator in Mind with a Wide Working Range
- Antennas with On and Off-Ground Options

High Data Rate, Bandwidth, and Power

Engineering products with materials that can be submerged for long periods of time without degradation.

TE COMPONENTS SUPPORTING IoT END DEVICES

Radio Frequency Signal Interconnect

- [Bluetooth Antennas](#)
- [Cellular Antennas](#)
- [ISM, LPWAN, LoRa Antennas](#)
- [GPS, GNSS Antennas](#)
- [Outdoor Antennas](#)
- [Public Safety Antennas](#)
- [Vehicle Antennas](#)
- [Wi-Fi Antennas](#)
- [Custom Antenna Designs](#)
- [RF Connectors](#)
- [Micro Coaxial Connectors & Cable Assemblies](#)

SIM Card

- [SIM Connector](#)

IC/Module/RF Circuit

- [Board Level Shielding](#)

Power Connect

- [Power and Battery Connector & Holder](#)
- [Spring Fingers](#)

Memory

- [SD Connector](#)

Baseband & Digital Signal Interconnect

- [Board-to-Board Connectors](#)
- [Wire-to-Board Connectors](#)
- [FPC Interconnect](#)
- [Fine Pitch Board-to-Board/Board-to-FPC](#)

Interface

- [Dock Connectors](#)
- [D-Shaped Connectors](#)
- [Jacks & Plugs Connectors](#)
- [USB Connectors](#)

EXAMPLE TE COMPONENTS SUPPORTING IoT END DEVICES

5G/LTE Panel Mount Antennas

- 2G/3G/4G/5G/CBRS/LTE
- 410-5925 MHz
- External puck-style multiband
- Ground plane independent
- IP67
- Compact, robust design

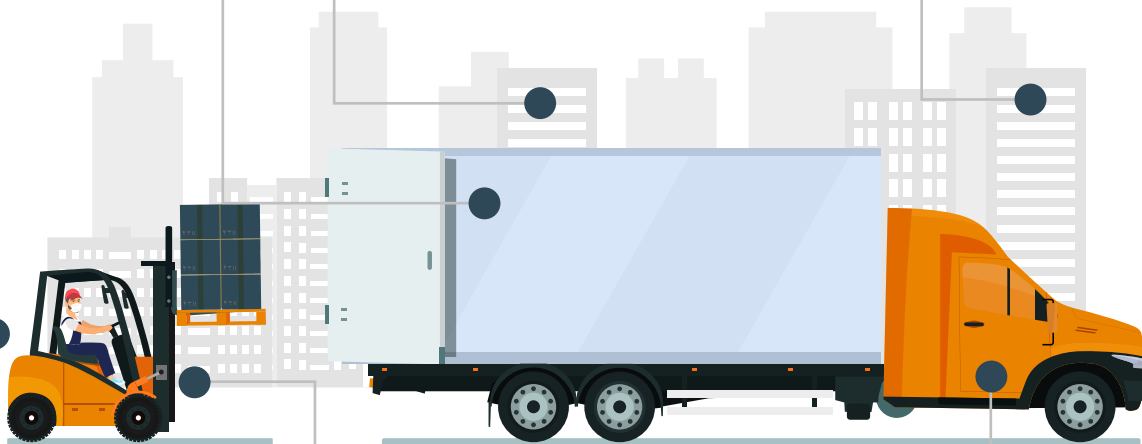

MiMo Wireless Access Antennas

- 2x2 MiMo for 4G/5G LTE
- 617-6000 MHz
- Global cellular coverage
- Stylish, portable housing
- Cost-effective solution to increase bandwidth and signal strength

Omnidirectional Baton Antennas

- 4G/5G/CBRS
- 698-4200 MHz
- Rugged outdoor construction
- Weatherproof UV stable radome

Low Profile Omni Antennas

- 5G Phantom
- Global cellular coverage
- IP67
- Ground plane independent
- Rugged, robust construction

Indoor/Outdoor Blade Omni Antennas

- 4G/5G
- 617-7125 MHz
- IP67 and non-rated configurations
- Ruggedized to support high shock, vibration, and humidity
- Hinged/swivel connection

Trigger Multiport Antennas

- 3G/4G/5G/ISM/CBRS, Wi-Fi, GNSS
- Ideal for vehicle under-dash locations
- Multiple port configurations
- Easy installation
- IP67

TE SOLUTIONS FOR THE INTERNET OF THINGS

Across industries, TE Connectivity provides safe, sustainable, and efficient connector and antenna solutions along with implementation and optimization services to enable a more connected world. The Internet of Things links end devices and access points to everyday settings and tasks that help individuals, businesses, and potentially whole societies live in a smarter and more comfortable way. Below are just a few IoT products from our extensive portfolio.

For the full selection, visit www.te.com/iot-connectivity.

RF CONNECTORS

FEATURES

- Transmit analog signals while minimizing RF signal losses
- Available in small sizes, with tight tolerance electrical characteristics
- Rugged materials manufactured to withstand high use in harsh environments
- Includes MIL-standard connectors qualified for M39012, M55339, M83517

ORDERING INFORMATION

Description	Max Frequency	Part Number
Right Angle Through Hole SMA Jack	18 GHz	5-1814400-2
Right Angle Cable Mount SMB Plug for RG174/RG188/RG316 Cable	4 GHz	414002-2
Right Angle Through Hole BNC Jack with Bulkhead	4 GHz	5415025-1

MICRO COAXIAL CONNECTORS AND CABLES

FEATURES

- Suited for applications requiring high density and reliability in a reduced size
- Excellent RF performance up to 6 GHz
- Wide range of coaxial cable connector configurations

ORDERING INFORMATION

Description	Max Frequency	Part Number
UMCC Gen I Receptacle	9 GHz	2337019-1
RF Switch	11 GHz	2081956-1
SMA to UMCC Gen I Cable Assembly 100 mm length	9 GHz	2016692-2

INTERNAL/EMBEDDED ANTENNAS

FEATURES

- Cellular 5G NR, LPWA/mMTC, NB-IoT, LTE-M, LoRaWAN, Sigfox, WLAN/Wi-Fi, 2.4 GHz ISM,
- Bluetooth, GNSS L1+L2+L5, UWB, and more
- Different antenna mounts including: surface mount, through-hole mount, adhesive mount, connector mount
- More than 300 standard internal antenna SKUs available for fast sample testing
- Custom solutions available with high-performance, low-profile solutions to meet customer needs

ORDERING INFORMATION

Description	Part Number
FPC Adhesive Antenna, 617-7125 MHz, Cellular, GNSS, Wi-Fi 6E	2108921-2
Wi-Fi 6E Triple Band on Board Antenna	2118908-2
GNSS Ceramic Patch Antenna	2108844-1

EXTERNAL ANTENNAS

FEATURES

- Batons, blades, whips, pucks, panels, domes, yagis, vehicle fins, ceiling mounts, and more form factors available
- Cellular, Wi-Fi, Bluetooth, ISM, Lora, GNSS, and many more frequencies available
- High reliability: high performance, rugged packages with extensive environmental testing
- Various connector options available for broad compatibility (?)

ORDERING INFORMATION

Description	Part Number
5G Outdoor Swivel Blade Dipole, 617-7125 MHz, IP67, SMA male	DBA6171C3-BSMAM
5G Phantom, no ground plane required, 617-7125 MHz, IP67, Type N female	FTRA6171M6PBN-001
Broadband panel-mount puck, ground plane independent, 410-5925MHz, SMA male	-

EASILY FIND THE ANTENNA THAT FITS YOUR NEED WITH OUR NEW ANTENNA SELECTOR

CUSTOM ANTENNAS

FEATURES

- Options for customization of off the shelf products including: connector, cable, frequency, etc.
- Laser Direct Structuring (LDS) antennas can be designed around existing components or structures to save space in the device and still provide a 3D antenna for enhanced performance
- Customer logo printed/embossed on antenna

Looking for a custom antenna solution or expert support in finding the right antenna for your design?

[SUBMIT A REQUEST NOW >](#)

FPC CONNECTORS

FEATURES

- Highly suited for miniaturized applications
- Allows for cable routing that can bend and twist
- No tooling required
- Variety of centerline spacing options

ORDERING INFORMATION

Description	Pin Count	Part Number
Back flip / Dual contact .5 mm	10	1-2328702-0
Back flip .3 mm	13	1-2328724-3
Front flip .25 mm	14	1-2040832-4

AMPLIMITE D-SUB CONNECTORS

FEATURES

- Designed to offer robust connection in a wide range of applications
- Board to board and cable to board connector variants
- Low profile allows high density contacts needed in IoT applications
- Available in shielded variants

ORDERING INFORMATION

Description	Pin Count	Part Number
Receptacle, Board-to-Board	25	2-5747708-0
Receptacle, Cable-to-Board	68	5786555-7
Plug, Cable-to-Cable	9	205204-4

WIRE-TO-BOARD CONNECTORS (AMP CT, MINI CT, MICRO CT CONNECTORS)

FEATURES

- 2 kinds of termination methods: IDC, Crimp
- Discrete wire interconnect
- Circuits range from 2-25 single row, 8-40 dual row

ORDERING INFORMATION

Description	Pin Count	Part Number
2.0mm CT T/H Vertical Box Header (8 Position)	8	292132-8
1.5mm Mini CT SMT Inverted Thru-Board Assembly (6 Position)	6	2106091-5
1.2mm Micro CT Header Assembly (4 Position)	4	2355091-4

HIGH PERFORMANCE INTERCONNECTS (HPI)

FEATURES

- Addresses the needs of low-profile applications that require a reliable, secure wire-to-board signal or low-power connection
- Locking feature strengthens the mating connection and comes with tactile click feedback when mating
- Cost-effective, industry standard design

ORDERING INFORMATION

Description	Position	Part Number
1mm Locking HPI Housing	4	2367198-4
2mm Right Angle HPI Header	6	440055-6
2mm Vertical HPI Header	4	1775470-4

MODULAR JACK CONNECTORS

FEATURES

- Engineered to make secure and reliable input/output connections
- Compact, one-piece construction, with preloaded contacts, providing space-saving, quick-to-install solution

ORDERING INFORMATION

Description	Category	Part Number
RJ11 Connector	CAT 3	216780-2
RJ.5 Connector	CAT 5e	2170129-1
RJ 45 Connector	CAT 6	5556416-1

RIBBON CONNECTORS

FEATURES

- Offers quick, reliable connections without stripping or prepping wires
- Used to make transition between ribbon cable and PCB circuitry
- Available with mass termination capabilities and several centerline options

ORDERING INFORMATION

Description	Polarization	Part Number
Cable attached 10 position	Center	5499922-1
Board attached 16 position	Dual	5103308-5
Wire to board 26 position	Free	1-746610-6

SIM CARD CONNECTORS

FEATURES

- Optimized for reliability
- Pre-loaded contacts and spherical contact points improve normal force
- Design freedom, with many products scalable in height within the same form factor

ORDERING INFORMATION

Description	Polarization	Part Number
Mini SIM connector(2FF)	Push-push	1981959-1
Micro SIM connector(3FF)	Push-pull	2199337-5
Nano SIM (4FF)	Push-pull	2336582-1

SPRING FINGERS

FEATURES

- Used for grounding between a device and PCB
- Provides shielding for anything that can cause vibrations within a device (motors, speakers, microphones)
- Cost-effective solution, requiring limited space

ORDERING INFORMATION

Description	Uncompressed Height	Part Number
Ultra-Small, C-Clip	1.15 mm	2329497-2
High Current, Pre-loaded, C-Clip	2.4 mm	2286211-3
Uncompressed Height, C-Clip	7 mm	440423-1

COIN BATTERY HOLDERS

FEATURES

- Helps improve button battery assembly process
- Easy to use, providing reliable connection between battery & PCB
- Wide application use

ORDERING INFORMATION

Description	PCB mount direction	Diameter	Part Number
Coin battery holder for CR2032	Horizontal	20 mm	796136-1
Coin battery holder for CR2032	Vertical	20 mm	1775485-1
Stamped metal coin battery holder for CR2032 and CR2025	Horizontal	20 mm	BAT-HLD-001-TR

USB TYPE-C CONNECTORS

FEATURES

- Provide one interconnect solution for data, power, and A/V
- Enhanced board retention features for added durability
- IPX waterproof and IPX4 splash proof options available
- Save valuable real estate, with one of the smallest dual row SMT footprints

ORDERING INFORMATION

Description	Board Mount	Part Number
USB 3.1 Receptacle on Board Dual Row SMT, IPX8	Top	2305018-2
USB 3.1 Receptacle Offset 0.65mm Dual Row SMT, Splash Proof	Mid Mount	2295018-2
USB4.0 Gen3 Mid PCB Mount Receptacle	Bottom	2385692-1

TE offers a complete family of board mount receptacles, including various orientations and PCB mounting styles. Click [here](#) to see our full portfolio solutions.

WHY PARTNER WITH TE?

Our history in design engineering, global manufacturing prowess, materials science expertise and signal integrity analysis are benefits that contribute to the value of partnering with us. At TE, we view our role of consultant as a trusted advisor, who helps to bring value to our customers through innovative and customized solutions.

Partnerships that Enhance Innovation

We collaborate closely with customers and peers in the development of new technologies.

Solutions for High Performance

Our products can support high-speed, energy-efficiency, and miniaturization in cloud, IoT end point and edge markets.

Faster, Flexible Service

TE's manufacturing and value-added services deliver top quality, highly efficient products to meet dynamic design cycles.

End-to-End Connectivity

TE offers a broad range of product options across data communications and IoT applications, giving customers the opportunity to consolidate their supplier base.

Sustainable Partnership

TE's engineering and manufacturing expertise, combined with our global footprint provides one of the largest connectivity and sensor portfolios.
